

ProjectSolve Quick Fix Troubleshooting for Use of Internet Explorer 8.0

ProjectSolve is now compatible with IE8. You will have to run **ProjectSolve** in IE7 compatibility mode.

In order to enable and turn on Compatibility View Mode for all web pages and website, use the following:

- In Internet Explorer, click on “Tools” menu and select “Compatibility View Settings”
- In the “Compatibility View Settings” dialog, click the check box for “Display all websites in Compatibility View” option
- Click on “Close” button when done

The IE7 Standards document mode in IE8 Compatibility View mode is activated immediately, which makes IE8 behave a little bit more like IE7.
